

## WHAT ARE OUR CUSTOMERS\* SAYING?

“Physician Scheduler provides my practice with clear, rules-based scheduling. This prevents internal group conflicts over workload and scheduling. And with the powerful reporting capabilities of the software, all members can see the relevant statistical comparisons. The software is also easily adapted as a practice gains in size and scheduling complexity.”

Gregory M. Somerville, M.D.  
Partner/Anesthesiologist  
Associated Anesthesiologists  
Fort Wayne, Indiana

“I like so many things about the software, including the reports, scheduling equitability, the availability window, the time savings and its customer-friendly design.”

Kelli Garner  
Scheduling Analyst  
Critical Health Systems  
Garner, North Carolina

“The bottom line? The software works, and does what is absolutely needed. I love the ability to create a year’s call schedule and know it’s going to be equitable.”

Heidi Call  
Scheduling Coordinator  
Spectrum Medical Group  
Scarborough, Maine

“I could generate a week’s schedule manually, but I wouldn’t have reporting, schedule equity, analysis capability and the availability of data for the future. It provides a complete data trail, which is a lot easier to reference than sticky notes! Physician Scheduler allows for growth without bogging down system details. I could go on and on.”

Carol Edwards  
Administrative Specialist  
Maine Medical Center/Spectrum Medical Group  
Portland, Maine

“I like the software’s sophistication that enables very specific programming. The software works exactly for my needs.”

Mark Harris, M.D.  
Associate Professor  
Department of Anesthesiology, University of Utah  
Salt Lake City, Utah

\* Customer responses received at 2007 AtStaff User Conference, Sept. 26-27, 2007, Las Vegas, NV

“I love the software’s Web interface for physicians and facilities to show that schedules are up to date. This saves us hours of work emailing, faxing, copying revisions after revisions, and no one would still be sure what the final schedules would be. In addition, we have a custom report that calculates our unique payroll procedures, which, again, saves hours of time and is much more accurate than when we had multiple databases to gather information together.”

Donna Steele  
Corporate Radiologist Scheduler  
Quantum Imaging & Therapeutic Associates  
Lewisberry, Pennsylvania

“I like this software and want to learn more about it. One of the main benefits is the ease of use and automation. That allows me to spend more quality time with my family.”

Ananth Kashikar, M.D.  
Springfield Anesthesia  
Springfield, Massachusetts

“A key is that the software ensures schedule equity, and I can print reports at a moment’s notice to explain or justify why a doctor is assigned call or assigned here or there. Also I like the fact that improvements to the product are constantly being made.”

Brenda Johnson  
Administrative Secretary  
Scott & White Memorial Hospital  
Temple, Texas

“I like the ability to make customized reports using the MS SQL tables. Our department had used an in-house created scheduling program, and faculty and administrators were used to specific reports. With Physician Scheduler, we were able to duplicate and enhance those reports since we were able to use the SQL tables.”

Ellen Osadciw  
Senior Information Analyst/Scheduling Coordinator  
Department of Anesthesiology  
University of Rochester Medical Center  
Rochester, New York

“I value the fact that the schedule is available for all the physicians to access and view at all times, with real-time updates. I also like the fact that you can enter notes, and that they are visible for everyone to see. This helps reduce conflicts, confusion and questions as to why a change was made to the schedule.”

Carol McGee  
Scheduler  
Progressive Physicians Associates  
Easton, Pennsylvania

“I generate custom reports so I especially like the fact that the software utilizes MS SQL Server.”

Bill Voter  
Senior Technical Associate  
Department of Anesthesiology  
University of Rochester Medical Center  
Rochester, New York

“While I’m not the primary user of the software at our location, I am pleased with the ability to manage multiple assignments in our large organization. The reporting tools make it easy to see the fairness of call distribution.”

Carol Baker  
Practice Manager  
Critical Health Systems/Raleigh Practice Center  
Raleigh, North Carolina

“Physician Scheduler keeps accurate statistics for reporting. With over 250 people to schedule, it’s a lot better than a manual process.”

Evie Counts  
Staffing Administrator  
Washington University School of Medicine  
St. Louis, Missouri

“We like the automation, statistical tracking, Web access for staff, and the historic data stored at a single location.”

Janis Finch  
Physician Resource Director  
Radiology Associates  
Eugene, Oregon

“I like the automation and request functionality. Being new to the software, I can see a lot of benefits to the system.”

Jeffrey Ilko  
Manager, Administrative Services  
Washington University School of Medicine  
St. Louis, Missouri

**About Physician Scheduler**

Physician Scheduler® from AtStaff is healthcare's proven physician scheduling solution, time tested since 1993 to automate schedules for all physician specialties while ensuring equitable workload and improving productivity and profitability.

No other product can compare to Physician Scheduler's industry track record and customer base, a reflection of the software's unrivaled flexibility and reliability, and advanced, rules-driven scheduling technology.

Of the top 14 U.S. hospitals named by *U.S. News & World Report* in its 2006 ranking of "America's Best Hospitals," Physician Scheduler schedules physicians in at least one department at nine of them.

Every day, Physician Scheduler accommodates the most intricate physician scheduling rules and requirements in the most demanding, fast-changing environments --- from small medical practices to hospital enterprise settings.

More information is available at [www.physicianscheduler.com](http://www.physicianscheduler.com), or by contacting the Physician Scheduler Team at 919-382-8282, option 1 then option 2, or e-mail us at [mark@physicianscheduler.com](mailto:mark@physicianscheduler.com).

**About AtStaff**

AtStaff develops demand management, staff management and physician scheduling software that enables healthcare organizations and providers to improve healthcare quality and patient safety, increase profitability, and enhance staff recruitment and retention. Hospital enterprise solutions and physician scheduling systems from AtStaff serve more than 1,200 healthcare organizations, medical facilities, nursing departments and group practices.
